Ejercicio 1 Mayor de dos números

The screenshot shows the Visual Studio Code interface with a Python file named `p1.py` open. The code is written in Spanish and implements a logic to find the maximum of two numbers, `num1` and `num2`. The code includes comments for each step: starting, requesting input, reading values, comparing, and displaying the result. The logic uses nested conditional statements (`if` and `else`) to determine which number is greater or if they are equal.

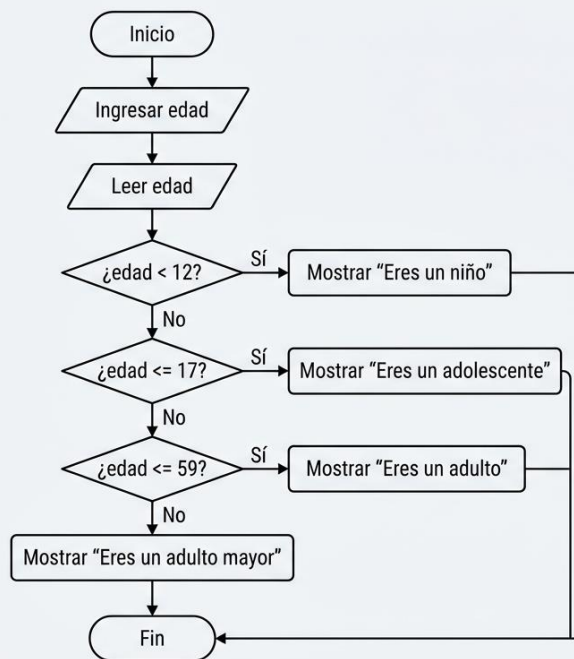

```
1 Inicio
2 solicitar al usuario que ingrese 2 números enteros
3 Leer num1
4 Leer num2
5 Si num1 > num2 entonces
6     Mostrar "El número mayor es: ", num1
7 Sino
8     si num2 > num1 entonces
9         Mostrar "El número mayor es: ", num2
10        Sino
11            Mostrar "Ambos números son iguales."
12        Fin Si
13 Fin Si
14 Fin
```

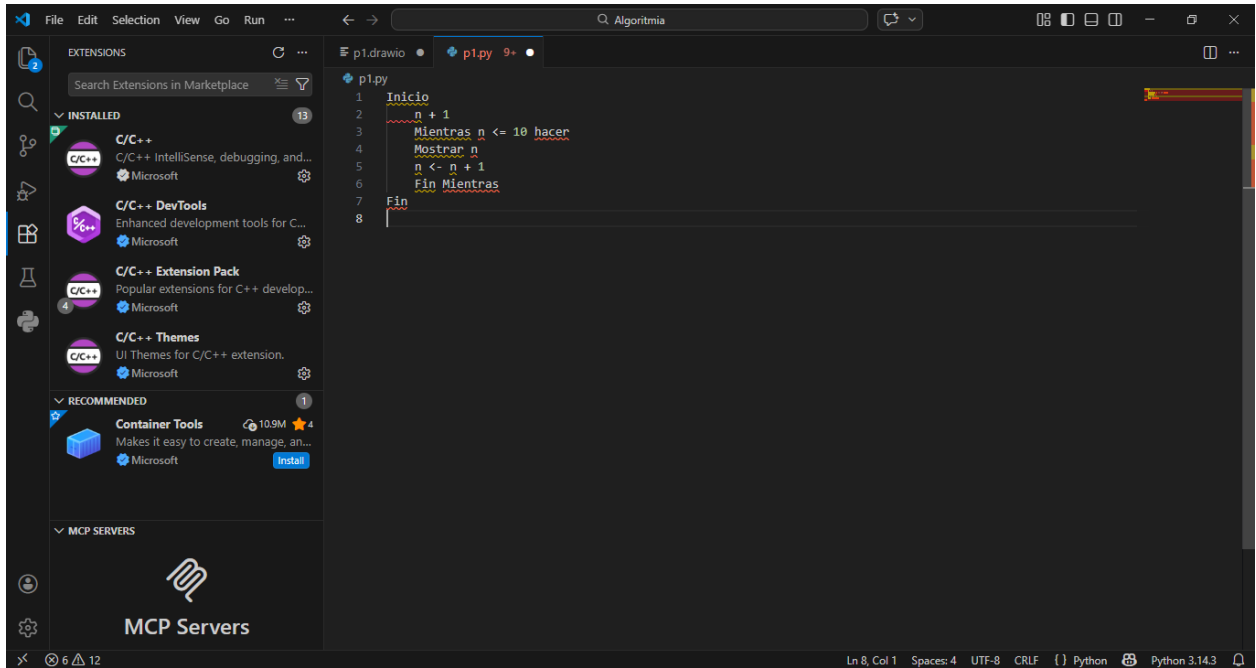

Ejercicio 2 Clasificación de edad

The screenshot shows the Visual Studio Code interface. On the left, the 'EXTENSIONS' sidebar is open, displaying a list of installed and recommended extensions for C/C++. The main editor area shows a file named 'p1.py' with the following code:

```
1 Inicio
2 Ingresar edad
3 Leer edad
4 Si edad < 12 Entonces
5     Mostrar "Eres un niño"
6 Sino
7     edad <= 17 Entonces
8     Mostrar "Eres un adolescente"
9     Sino edad <= 59 Entonces
10        Mostrar "Eres un adulto"
11    Sino
12        Mostrar "Eres un adulto mayor"
13    Fin Si
14 Fin
15 Fin
```

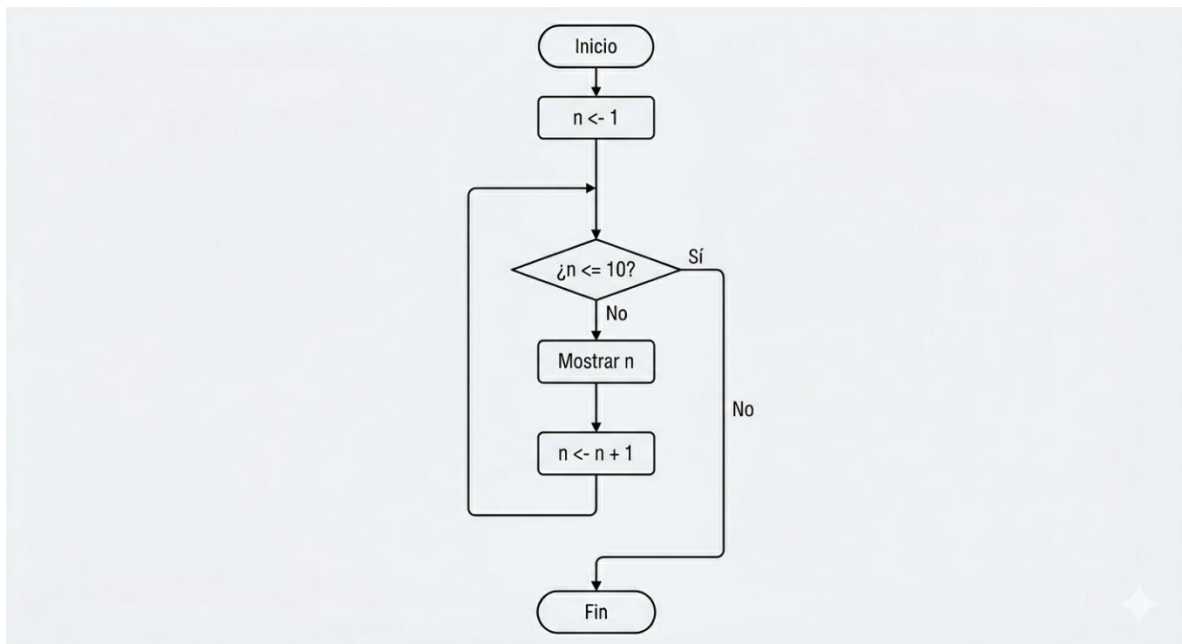

Ejercicio 3: Números del 1 al 10

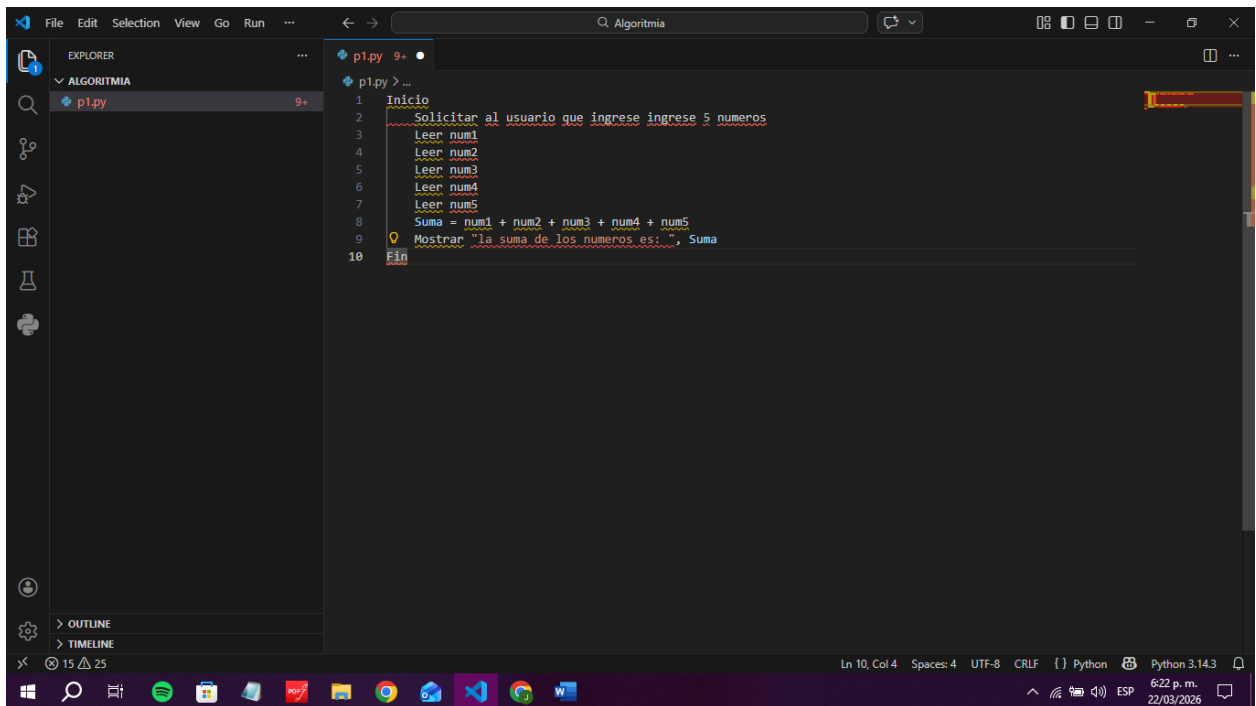

The screenshot shows the Visual Studio Code interface. On the left, the 'EXTENSIONS' sidebar is open, displaying a list of installed and recommended extensions for C/C++ development. The main editor area shows a file named 'p1.py' with the following Python code:

```
p1.py
1  Inicio
2  n <- 1
3  Mientras n <= 10 hacer
4  Mostrar n
5  n <- n + 1
6  Fin Mientras
7
8
```

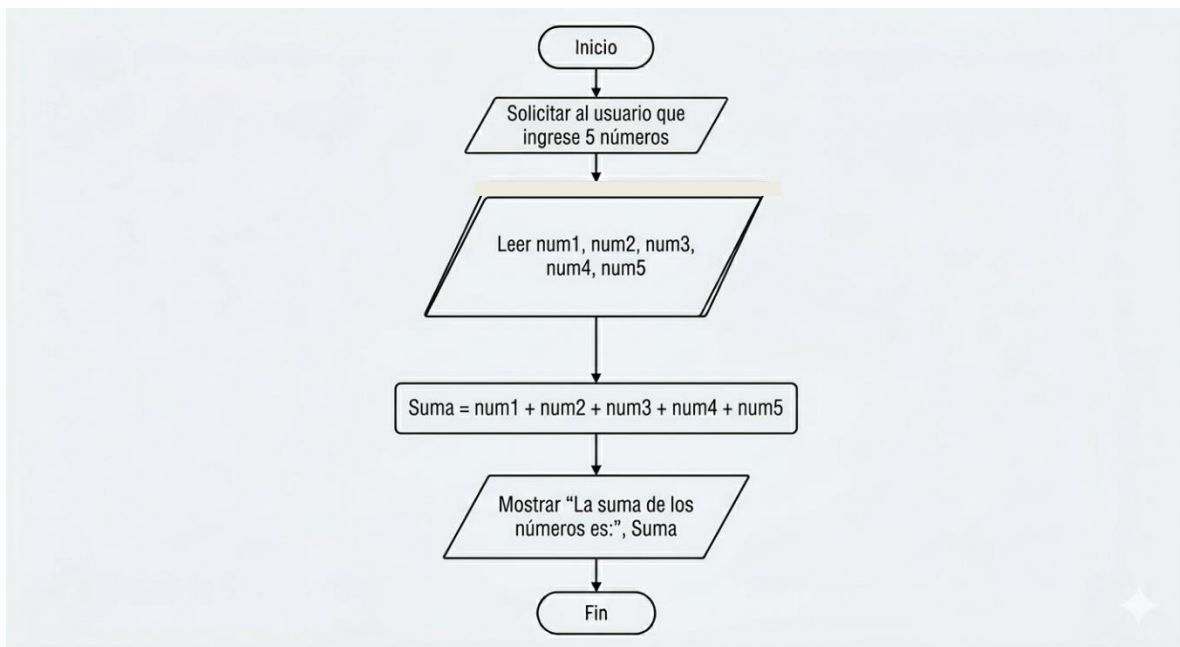

Ejercicio 4: Suma de 5 números

```
1 Inicio
2 Solicitar al usuario que ingrese ingrese 5 numeros
3 Leer num1
4 Leer num2
5 Leer num3
6 Leer num4
7 Leer num5
8 Suma = num1 + num2 + num3 + num4 + num5
9 Mostrar "la suma de los numeros es:", Suma
10 Fin
```

The screenshot shows a code editor with a dark theme. The left sidebar has an 'EXPLORER' pane with a file named 'p1.py'. The main editor area contains a Python script. The script starts with 'Inicio' (line 1), followed by a comment 'Solicitar al usuario que ingrese ingrese 5 numeros' (line 2). Lines 3-7 are 'Leer num1' through 'Leer num5'. Line 8 is the calculation 'Suma = num1 + num2 + num3 + num4 + num5'. Line 9 is the output statement 'Mostrar "la suma de los numeros es:", Suma'. The script ends with 'Fin' (line 10). The status bar at the bottom indicates 'Ln 10, Col 4', 'Spaces: 4', 'UTF-8', 'CRLF', and 'Python 3.14.3'.

Ejercicio 5: Contador de números positivos

```
File Edit Selection View Go Run ...
Algorithmia

p1.py 9+
1 Inicio
2 contador = 0
3 ingresar numero
4 leer numero
5 mientras numero > 0 entonces
6     Si numero > 0 entonces
7         contador = contador + 1
8     Fin Si
9
10 Leer numero
11 fin mientras
12 mostrar ("cantidad de numeros positivos: ", contador)
13 Fin
```
